National Mortality Review Committee | Perinatal and Maternal Mortality Review

Rapid reporting form for a perinatal death – mother

Please use the *Guidelines for the completion of the mother and baby forms following a perinatal death March 2016 Version 10* to help you complete this form. You can obtain these guidelines from www.otago.ac.nz/pmmrc. Please contact your local coordinator for assistance with logging in.

Both the mother and the baby National Mortality Review Committee forms need to be completed by the lead maternity carer or other clinician for any baby who dies from 20 weeks gestation (ie, ≥20°, or **if gestation is unknown** a birth weight ≥400 g), including all terminations, to before 28 completed days of life (ie, up to midnight on the 27th day).

This mother form can be submitted electronically before you submit the baby form. If you are submitting written forms, please courier this and the mother form to the address at the end of the form. We understand that you may not know the answer to some questions, but please answer as many as possible. Compulsory entries are marked with two asterisks (**).

Please complete within 48 hours of the baby's death if possible.

Personally identifiable information (of the mother, baby or lead maternity carer) collected on this form will be kept confidential. The information included in reports by the National Mortality Review Committee is grouped and non-identifiable.
