

Working together to provide culturally safe pregnancy care

for women and families of refugee
and migrant backgrounds

A SAFER BABY BUNDLE
COLLABORATION

Women and families of refugee and migrant backgrounds face a number of barriers to high-quality maternity care in Australia. Sadly, these barriers can contribute to poorer outcomes for families, including stillbirth.

Fortunately, we already know a lot about what helps to overcome these barriers. As an interpreter, you can make a real difference in the lives of families receiving pregnancy care in Australia.

Free professional development and resources are available to support culturally safe pregnancy care.

These include:

- Professional development eLearning modules for interpreters and health professionals
- Practical videos and fact sheets
- Detailed 'quick reference' language guide for interpreters working in pregnancy care settings
- Full suite of Safer Baby Bundle resources for families, including translated materials.
